JDW- Lonnie did tpe the O'Toole press conference yesterday morning for me. He will give me the tape, the book nd some promotional material when hecomes here Thursday. He and some of the other boys asked O'Toole what they regard as hard questions without getting answers or satisfactory answers. He says that O'Toole did go after the FBI, as he declined to do on the TV shows I caught. This is fine. It limits it. It means that with or without sponsorship or direct connection n is doing a job for the CIA. (Where without them there is no sense, ~~and~~ vowels. This is the machine, notme, and it does not do 1/2 spaces.)

So, my O'Toole interest is even greater. Lonnie estimates that the expenditure for yesterday alone passes $50,000. Maybe. But the effort and cost are great. You should hear and you may see him thee. Any impressions as welcome as slips because so much of this is subjective. News-American did use Lonnie's story yesterday. I've not heard a word and I think it is the kind of story that without the attention to the overall recently most papers would have used.

This whole thing is getting pretty hairy. If there is no orchestration, there is no orchestration that could have all the notes more in tune. Including Gregory No time for newest on that; Lone promotion now and internal disunity. (Schoenmann seems out henceforth.)

Another example: Bud has recommended Jim for investigating job with one of Congressional $ spook investigations. This will take Jim from all other work, including Ray case which would then be certain to lose, and in the end Jim won't pass security check. Meanwhile, his wife longs for regular income. HW 3/11/75
